State of Repair for Bridges in Berkshire County – effective May 2024

Berkshire County has nearly 750 bridges recorded in the Commonwealth's bridge inventory. Maintenance and uninterrupted operation of bridges are of key concern to our towns and cities, as their closure can greatly impact travel, quality of life and commerce in a surrounding community. As of May 1, 2024, in Berkshire County, there are currently **thirteen** bridges listed as Closed and **sixty-eight** listed as Posted for Load. A bridge is posted after an inspection or report indicates that the bridge should not regularly carry a load at one or more of the statutory weight limits, depending on the number of axles on the vehicle.

The following bridges are fully closed to traffic in Berkshire County as of May 2024:

- Adams: Gavin Street pedestrian bridge over Hoosic River
- Gt. Barrington: Cottage Street over the Housatonic River
- Gt. Barrington: Brookside Road over the Housatonic River
- Lanesborough: Bridge Street over Town Brook
- Lee: Willow Street over the Housatonic River
- North Adams: Brown Street over the Hoosic River
- Pittsfield: E New Lenox Road over Sackett Brook*
- Sheffield: Covered Bridge over the Housatonic River
- Sheffield: East Road over Ironworks Brook
- Stockbridge: Interlaken Cross Road over Larrywaug Brook
- Stockbridge: Averic Road over Larrywaug Brook
- Washington: Lower Sargent Road over Depot Brook
- Washington: Whitney Road over Roaring Brook

The following bridges are known to be reduced to one lane as a partial closure:

- Pittsfield: Pecks Road over the West Branch Housatonic River
- Clarksburg: Cross Road over Hudson Brook
- Gt. Barrington: Division Street over the Housatonic River (temporary span)
- Savoy: Route 116 over the Westfield River
- Stockbridge: Glendale Middle Road over the Housatonic River

The following bridges have funding currently targeted through various programs, including but not limited to the Municipal Small Bridge Program and the TIP:

- Adams: Quality Street over the Hoosic River (2025)
- Alford: West Road over Scribner Brook (2024)
- Becket: Quarry Road over Cushman Brook (2026)
- Cheshire: Sand Mill Road over Dry Brook (2024)
- **Gt. Barrington: Cottage Street over the Housatonic River (2026)**

*This bridge is currently under construction and reduced to one lane, but still listed as Closed on the Open Data portal.

- Gt. Barrington: Division Street over the Housatonic River (2026)
- Gt. Barrington: State Road over the Housatonic River (2026)
- **Lanesborough: Bridge Street over Town Brook (TBD)**
- Lee: Meadow Street over Powder Mill Brook (2024)
- Lee: Mill Street over Washington Mountain Brook (2026)
- Monterey: Curtis Road over the Konkapot River (2026)
- New Marlborough: Keyes Hill Road over the Umpachene River (2024)
- North Adams: Route 2 over the Hoosic River (2024)
- **North Adams: Brown Street over the Hoosic River (TBD)**
- Pittsfield: Wahconah Street over the West Branch Housatonic River (2026)
- Pittsfield: Pontoosuc Ave. over the West Branch Housatonic River (2026)
- Pittsfield: South Street over the Housatonic River and Housatonic RR (2026)
- Sheffield: Kelsey Road over Schenob Brook (2026)
- Tyringham: Jerusalem Road over Hop Brook (2027)
- Washington: Lower Valley Road over Depot Brook (2028)
- Williamstown: Main Street over Hemlock Brook (TBD)

Bridges in **bold** are currently closed, as listed above.

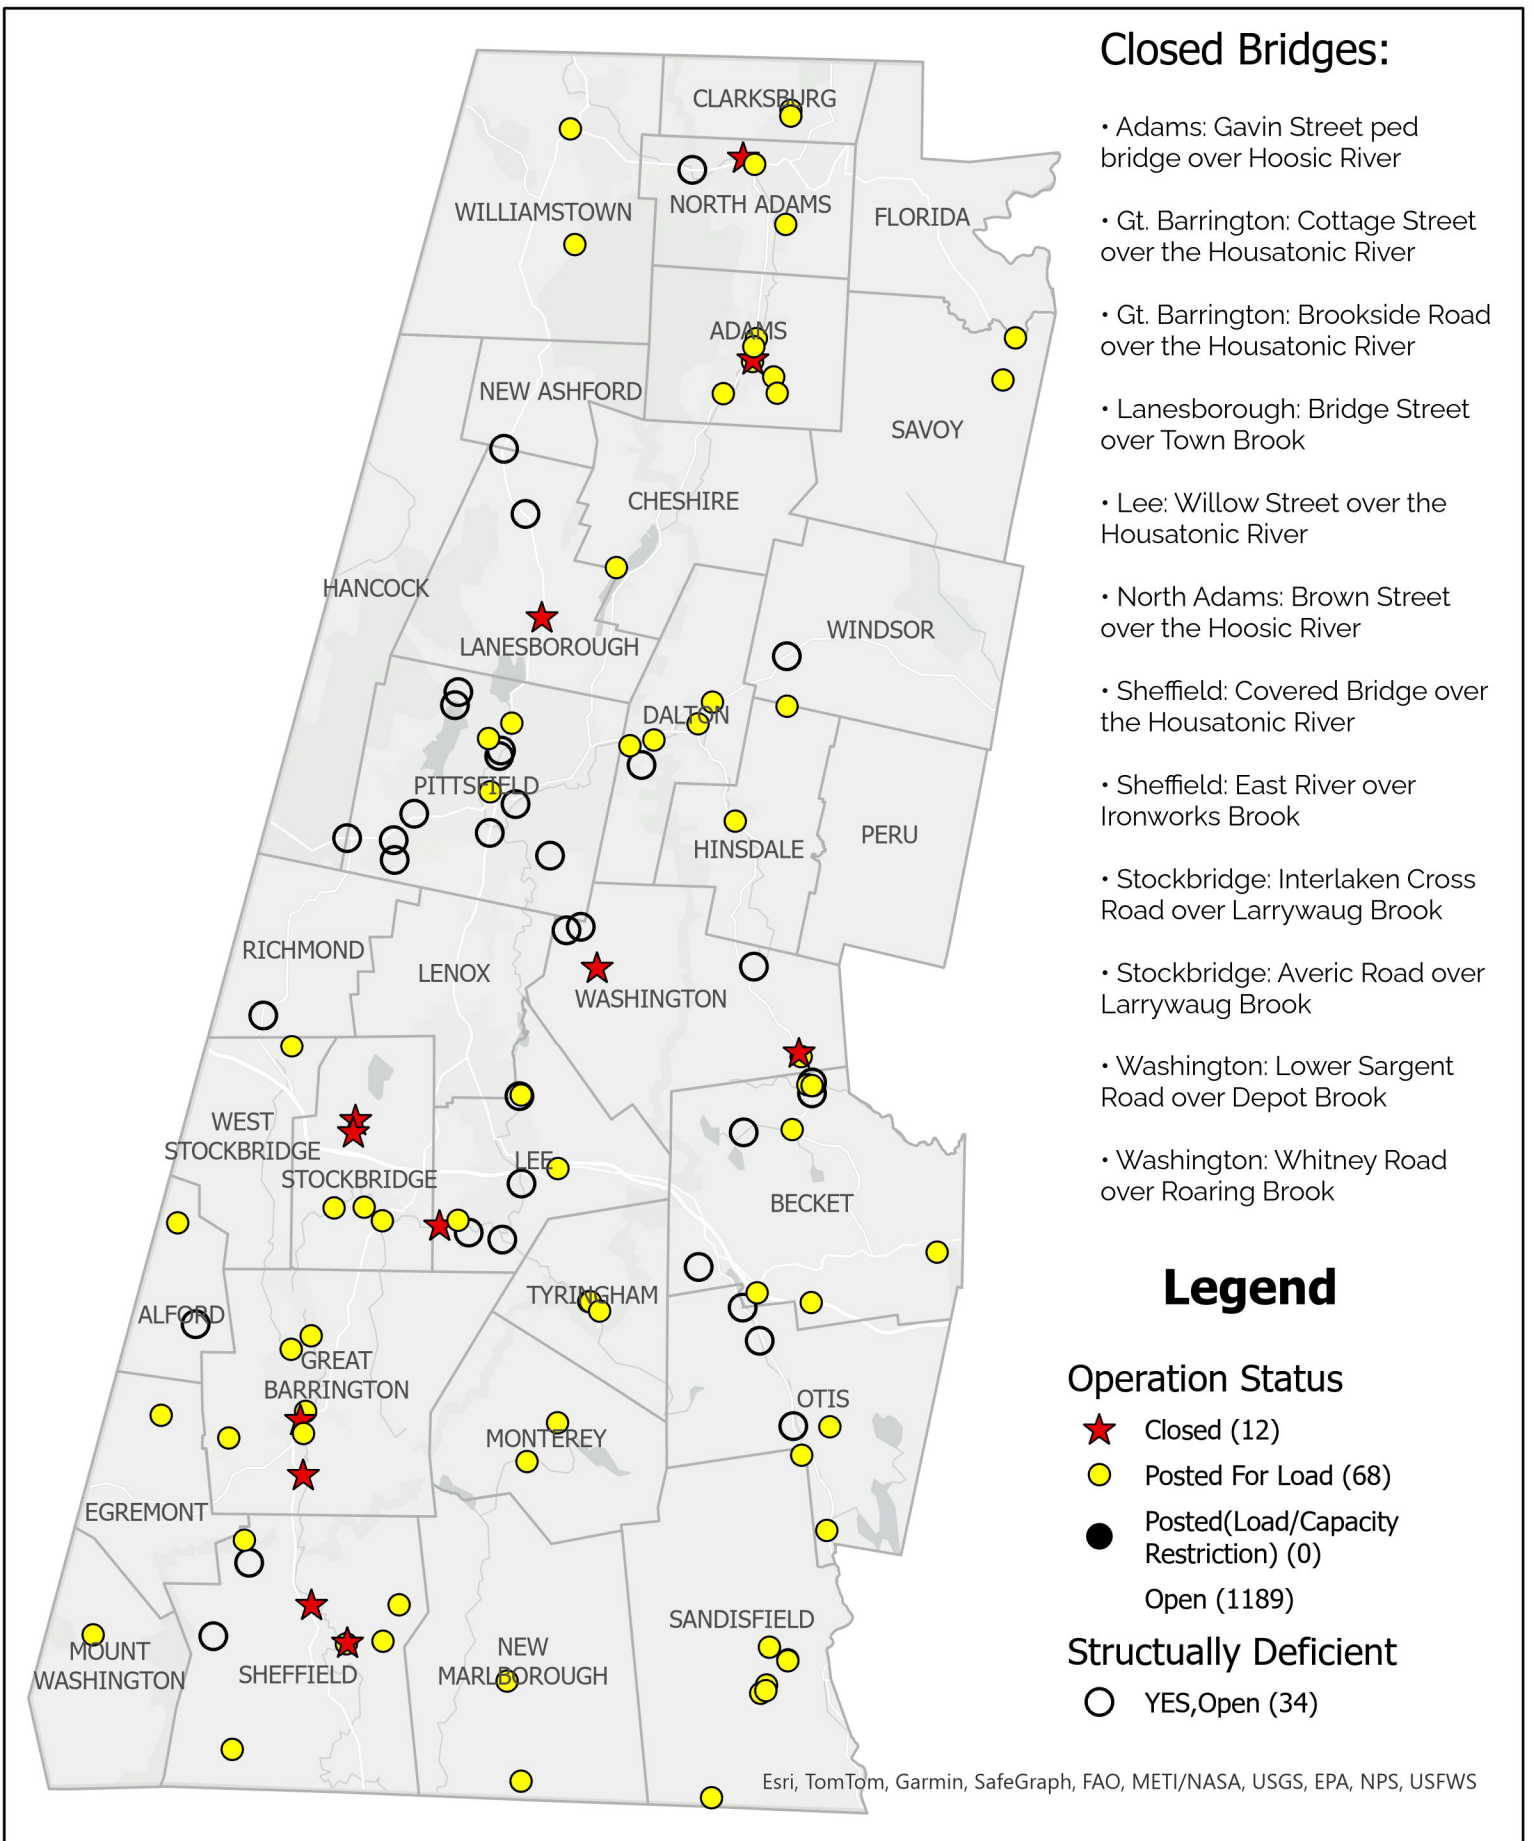

It is important to note that the bridge inventory list is a living database and is subject to change over time as bridges are inspected, rehabilitated, closed, or reopened. This document reflects a point-in-time inventory that may be updated periodically.

Looking to the future

Bridges in the Commonwealth are inspected every two years. When an inspection reveals that a bridge needs to be posted for a reduced vehicle load, or closed entirely, MassDOT bridge engineers contact city or town officials to alert them to the change and provide them with next steps. While leaders can never be certain that a bridge will be closed until after an inspection occurs, it can be helpful to prioritize repair or contingency plans for bridges that may be found deficient sooner than others. These include, in descending priority: bridges that are already posted, bridges with an overall "Poor" condition in the database, bridges that are listed as Structurally Deficient, and bridges that have one or more structure ratings at 5 or lower. Creating repair or contingency plans before a bridge is closed can help lessen the disruption to travel in Berkshire communities. And this is certainly already happening, as evidenced by the listing of bridges slated for repair above. In the past 5 years, 34 bridges have been replaced or rehabilitated around Berkshire County, as well.

Choosing which bridges to rehabilitate or replace with constrained funding is a complex task with no one correct answer. While having to react once a structure reaches an unsafe condition can cause inconvenience in the short term, it does not compare to the potential loss of life or property should a bridge fail during its normal life. Staying proactive will help to keep residents and commerce moving smoothly, and help officials stay on top of the continuous task of our infrastructure maintenance.

Bridge Status in Berkshire County

Berkshire County Bridge Inventory (effective as of: May 1, 2024)
